Color & Scale

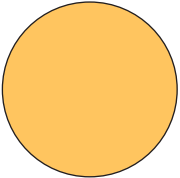

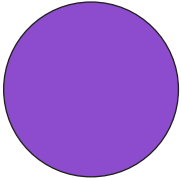

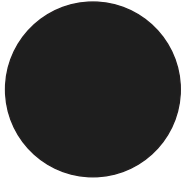

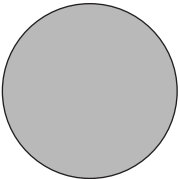

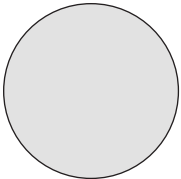

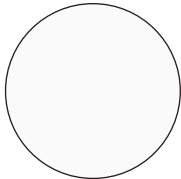

Color & Scale

It is crucial to use a strong layout and only the approved Bitcoin Depot brand colors so that our customers can identify who we are as a brand. Everything must be consistent to help build customer trust and brand recognition.

Color Palette

Primary Colors

These are the approved primary color values for use in all Bitcoin Depot communication. All copy that is designed must be colored in either yellow, grey or white. When laying out a background, design with high contrasting colors to make the readability more effective.

			
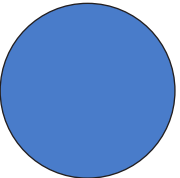

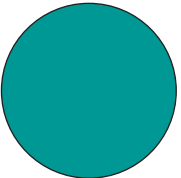

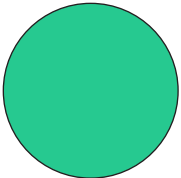

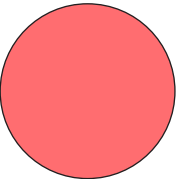

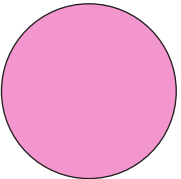

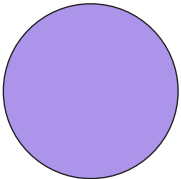

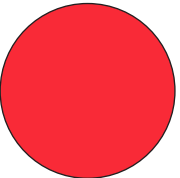

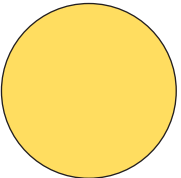

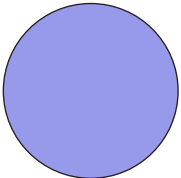

HEX	#FFC55F	#8C4CCD	#1E1E1E
RGB	255, 199, 4	140, 88, 205	30, 30, 30
CMYK	0, 22, 100, 0	59, 77, 0, 0	72, 66, 65, 75
			
HEX	#B9B9B9	#E2E2E2	#FAFAFA
RGB	185, 185, 185	226, 226, 226	250, 250, 250
CMYK	28, 22, 22, 0	10, 7, 8, 0	1, 1, 1, 0

Application & Standards

- Never apply purple to body copy
- Never pair yellow copy with white
- Balance the color matching when designing
- Use secondary colors for social posts, illustrations, & website assets
- Apply primary colors to flyers, brochures, and banners
- Always use contrasting color combinations

Secondary Colors

These are the approved secondary color values for use in all Bitcoin Depot communication. These colors are used mostly in illustrations and applied as subtle highlights in the website.

			
HEX	#497CCA	#009894	#26C990
RGB	73, 124, 202	0, 152, 148	38, 201, 144
CMYK	73, 48, 0, 0	82, 20, 46, 1	69, 0, 60, 0
			
HEX	#FFCD70	#F396CE	#AB94E9
RGB	255, 109, 112	243, 150, 206	171, 148, 233
CMYK	0, 72, 46, 0	4, 50, 0, 0	35, 43, 0, 0
			
HEX	#F92A37	#FFDD60	#9799EA
RGB	249, 42, 55	255, 221, 96	151, 153, 234
CMYK	0, 95, 80, 0	1, 11, 74, 0	41, 38, 0, 0

Scale

Relationship between objects and text

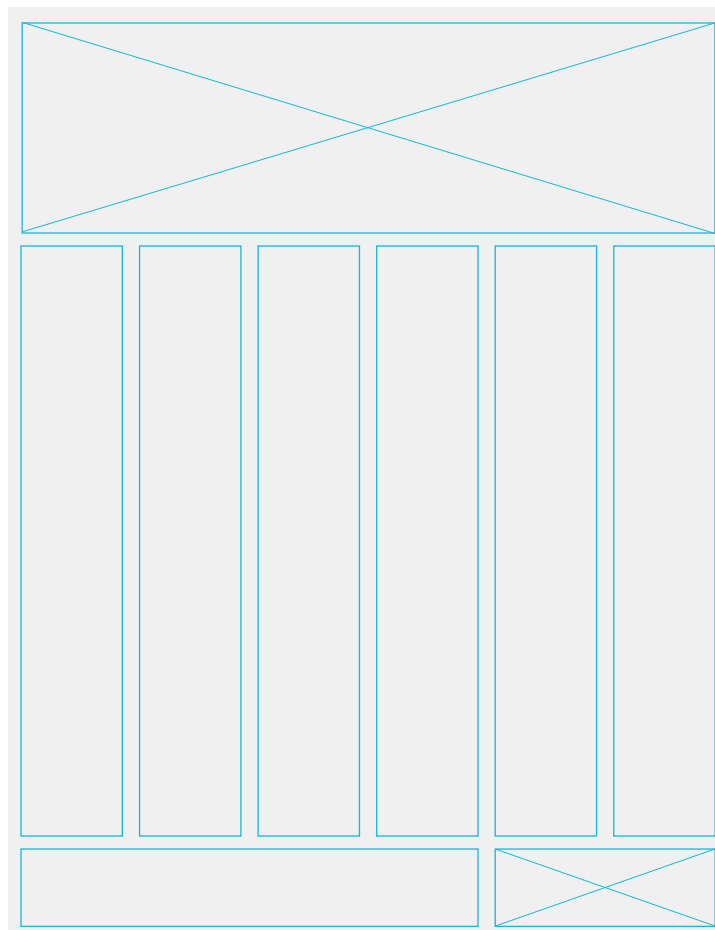

It is important when creating each design for everything to be properly comped into place. Using the logo is a central visual cue that we all use to identify a brand, and can help anchor the page. Everywhere the logo appears, it must act and behave the same way so consumers begin to recognize our brand as sound and secure as we begin to build their trust and develop a relationship between them. Be sure to always leave breathing room for all elements on the page.

As you build out your design whether it be a digital banner, printed flyer, or newsletter, it is important to maintain visual consistency at Bitcoin Depot.

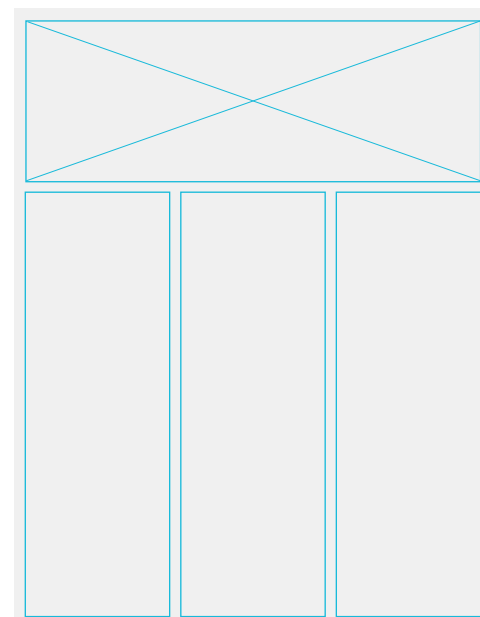

Bitcoin Depot Grid System

In graphic design, a grid is a structure made up of intersecting lines used to structure content, a skeletal frame. The grid system serves as an armature on which the designer can organize graphic elements (images, body copy, glyphs) in a rational and structional banner.

A grid can be used to organize graphic elements in relation to the documents dimensions.

CUSTOMER REFERRAL PROGRAM

EARN \$500 PER EACH LOCATION YOU REFER

X

We are interested in gas stations, convenience stores, and check cashing stores. However, sometimes we will partner with other stores such as liquor stores and smoke shops.

The location must either be open 24/7 or have long operating hours.

All you need to do it put us in contact with the business owner interested in hosting a Bitcoin ATM.

If we end up placing a Bitcoin ATM at the location you referred, you will receive **\$500**.

HOW IT WORKS

- Flat guaranteed amount of **\$500** per referral location
- Qualified lead includes providing the store owner's name, direct number and store address
- Store Location must qualify for BTM machine
- Store Location must pass location analysis
- Store Owner's business must be registered with the state the store location does business in
- Store owner must sign agreement and allow BTM machine to be installed

03.

Typography

Typography

Bitcoin Depot communicates with two typefaces for all communications in print and web. These are “Trade Gothic Next LT” as the primary typeface and “Helvetica Neue” as the secondary typeface. It is important to use the same fonts to maintain brand consistency. Please maintain the overall integrity of the typeface.

It is important to know the body copy before placing it into a document to be designed. Always be very mindful of margins, balanced gridding, and proper alignment. It is critical to have the typography gridded neatly with other elements in the design.

- Always use a 3 or 6 column grid
- Never leave widows or orphans
- Be mindful of kerning and leading

Typographic Hierarchy

Trade Gothic Next LT Pro | Primary Typeface

Headlines

As a general rule, headlines should either be white or gold on black backgrounds, or black text on white or gold backgrounds. Always fully capitalize when you can.

We use bold “Trade Gothic Next LT Heavy” for the headlines as the primary element on the page to immediately create hierarchy within the composition. For call outs or highlights, apply other brand color for that pop of attention.

Subheads

We use “Trade Gothic Next LT Light” for our subhead text. The subhead is an important element to the design as it generally is the secondary body of text that stands out from the page or spread.

Captions

The font we use for captions at discretion is “Trade Gothic Next LT Bold.” Captions aren’t used everyday but when they are needed, it is expected to be title capped and roughly the same saze as the body copy. Captions are to never float around.

Body Copy

We use “Trade Gothic Next LT Regular.” Body copy should always be pixel perfectly aligned with the left justification of the headline and subhead in order to maintain consistency. Given in situations where body copy is columned, the leading should be tighter.

Disclaimer

We use “Trade Gothic Next LT Bold.” for disclaimers at the bottom of flyers, web banners, and anything that needs to be accredited within the document. Disclaimers are usually 6pt in size.

Typographic Hierarchy

Typographic Construction

Pairings
It is important to maintain these type pairings. This allows for visual clarity, brand consistency, and a strong hierarchy for all communications. Heavy weight should be paired with Regular weight, Regular weight should be paired with bold weight, and Heavy weight with Light weight.

Heavy Header	Bold Header	Heavy Header	Heavy Header
Regular Subhead	Light Subhead	Light Subhead	Bold Subhead

HEADLINE Trade Gothic Next LT Heavy	THIS HEADLINE IS THREE LINES AND SET IN HEAVY This subhead is ½ the point size of the headline and set in Light
HEADLINE Trade Gothic Next LT Heavy	THIS HEADLINE IS TWO LINES THIS IS A CAPTION This body copy is ½ the point size of the headline and set in Regular
HEADLINE Trade Gothic Next LT Bold	HEADLINE This body copy is ⅓ the point size of the headline and set in Regular

Diacritical Marks

Quotation marks
When quotation marks begin a text line (whether a headline, subhead, or within the body copy), they should always be hung over the text’s left justification. The first letter of the text box should be aligned with the rest of the copy and the quotation mark should be “hanging” off it.

“BEST CRYPTO SERVICE,
BITCOIN DEPOT SAVES!”

Bullet points
If typing out a bullet point the shortcut is option+8 (mac) when inserting bullets manually into a text document. Bullet points can, in special situations, be a different brand approved color. Never use any other shape besides the standard bullet.

- BEST BTM SERVICE

Parenthesis
Parenthesis must always be sitting on the baseline of any text document.

(SAY NO TO FOMO)

Hyphens / en dashes / em dashes
The most commonly used dash is the hyphen and it is the shortest. We use hyphens for linking words and using phrases. If possible, it is better to avoid using hyphenations in text boxes. An en dash is purposed to connect numbers. dates in time, and grammatical breaks. An em dash is the longest of the marks and Bitcoin Depot does not utilize this mark.

— NOT TODAY FOMO

Currency
When writing currency amounts, they should appear as in these examples below. There is no space between the currency symbol and the money amount. Do not use any decimals to indicate the cents, instead superscript it. If a money amount is over \$999, then simply use the comma to seperate the numbers and then kern.

\$ 5,000,000⁹⁹

© ® ™
Trademark and registration symbols should be superscripted. If this cannot be done automatically, reduce the point size smaller and raise the baseline on which the symbol sits. Never follow the symbol with a period.

BITCOIN DEPOT[®]

@
The @ symbol should always be centered within the test when it sits in copy. The symbol should be slightly reduced in point size difgitally, and on stationary. All @ symbol’s need to be raised off the baseline of the copy and properly kerned to make the whole address clearly legible.

Brandon@BitcoinDepot.com

04.

Logo

Logo

The logo is the face of the brand and considered to be one of the most important factors when designing and keeping a brand consistent. Always be mindful of how the logo gets placed in different environments and dimensions and aware of the background colors when designing.

Logo Construction

Logo Construction, Clearspace and Computation

It is important to keep the logo clear of any other design elements. To regulate this, a certain amount of pixel distance has been established around the corporate logo. This pixel exclusion indicates how close other elements can be placed next to the company name and symbol. These two have a fixed relationship and should never be changed in any way.

In certain situations, a different logo lock ups are required to be used. In circumstances where the design calls for a large amount of horizontal negative space, use the longer horizontal lock up to effectively take up space within the design. If designing for something like a tiny web banner, utilize the smaller horizontal lock up to free up that negative space to make the design cleaner.

It is essential to use the correct color choice each time setting up a design. If the backdrop color is dark do not use the dark logo lock up, but a contrasting color to create a strong contrast.

Clearspace

Whenever you use the logo, it should be surrounded with a generous amount of clean space to ensure its visibility. No graphic design elements or treatments of any kind should ever invade the corporate logo isolation zone.

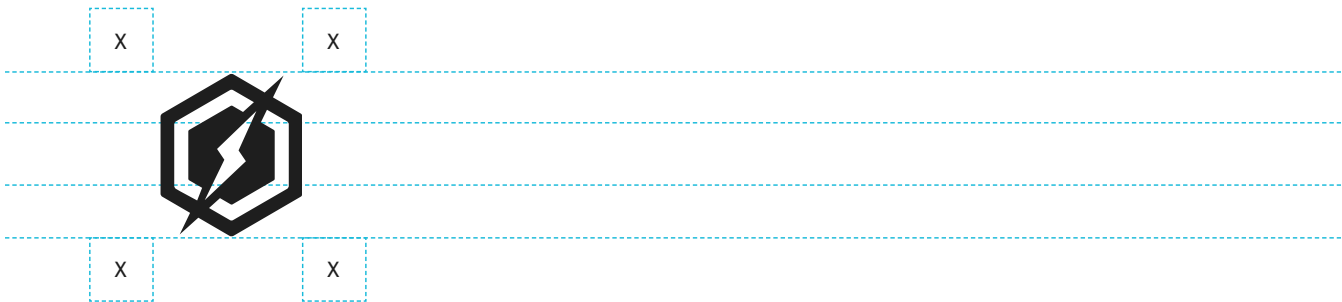

Calculation

To efficiently work out the clearspace take the height of the logo and divide it in half.

1. Full Symbol

2. Logo Symbol/Emblem

Logo Lock Ups

Horizontal Lock Up

Small Horizontal Lock Up

Vertical Lock Up

Small Vertical Lock Up

Emblem Lock Up

Standards & Applications

Color Variations

Whenever you use the logo, always consider what the background color is before placing it into the design. Be mindful of the lock up you are using and maintain using that lock up for that particular set up. Beneath this paragraph is a helpful guide of choosing the correct logo color choice, follow this as a reference in knowing what colors to use after you have selected the lock up to design with.

LOGO A

Background Dark Version

LOGO B

Background Colored Version

LOGO C

Background White Version

Print

The Bitcoin Depot logo must always be displayed clearly and conspicuously. The logo should always be placed on the bottom right of designs as an anchor to achieve brand consistency.

Size: No smaller than 1.25 inches

Digital

Because there is limited screen real estate, Bitcoin Depot has different limitations to placement on digital banners, ads, and newsletters. Using a technical reference will better help build fast comps and designs. When building online ads, the essential elements must remain in place: Bitcoin Depot logo.

Minimum Logo Sizes

Full Logo
Minimum Height: 134px

Logo Symbol/Emblem
Minimum Height: 134px

Logo Misuse

It is crucial that the appearance of the logo remains consistent across all dseigns. The logo should never be misinterpreted, modified, or additionally added to. In any case, no attempt should ever be made to alter the logo in any way. Its color, orientation and composition needs to remain as indicated in this brand book to protect the brand — there are no exceptions in altering the logo.

NO
Do not rotate the logo.

NO
Do not distort or warp the logo in any way.

NO
Do not use the wordmak without the icon.

NO
Do not change the lockup of the logo.

Incorrect Logo Application

- Do not invert the logo symbol
- Do not alter or skew the logo type style
- Do not change the relationship between the logo symbol
- Never change the proportions of the logo
- Do not place logo over design elements
- Do not place logo or logo symbol over two different colors
- Do not awkwardly place the logo near page cut off

05.

Composition

Composition

When making each composition, it is essential to keep a clean design and maintain brand consistency. Different designs call for certain compositions and it is important to know when to make those choices. It is crucial to maintain visual consistency to help strengthen the branding.

BITCOIN DEPOT INDEPENDENT CONTRACTOR PROGRAM

Join the largest Bitcoin ATM company in the world and get paid for referring locations for our BTMs!

OUR BACKGROUND

- Fastest growing BTM company
- First to ever reach 500 BTMs
- 100% USA owned & operated
- Located in 30+ states and growing
- Most recognized BTM brand worldwide
- 8% worldwide market share among 550+ competitors

Take Over Your City, Grow Your Own Bitcoin ATM Network

Selecting the right location can make the difference between a good location and super-star location.

SO WHY WOULD STORES WANT TO HOST A BITCOIN DEPOT ATM? HERE'S A COUPLE REASONS:

- Store receives monthly payments from us
- Store has no responsibility other than to provide us with a space for the BTM
- Store receives increased foot traffic from us

EARN \$500 FOR EVERY BTM INSTALLED!
All you have to do is provide us with potential store owner’s name, address, and phone number.

How to Refer a Location

Be brazen when seeking new locations for our ATMs and earn huge rewards.

We are looking to grow at an unprecedented rate and we need your help to reach our goals.

WHEN LOOKING FOR NEW LOCATIONS, HERE'S WHAT YOU NEED TO KNOW:

- We're looking for locations with high foot traffic
- Locations need to be within 2-3 miles of an existing location
- We place our BTMs in gas stations, smoke shops, malls, liquor/package stores, and convenience stores

ONCE YOU SIGN THE AGREEMENT, YOU'RE SET TO START YOUR HUNT FOR THE NEXT BITCOIN ATM LOCATION.

06.

Social Media

Social Media

Here at Bitcoin Depot, we're confident, magnetic, and fast. Having these great qualities, it's imperative to communicate to consumers the same way we communicate visually, with consistency.

Social Media

Imagery Aesthetic

When designing for social media, it is important to keep all platform content consistent in brand personality as well as uniform visual graphics. These graphics need to maintain the visual integrity of our brand. Always use the Bitcoin Depot brand approved colros and keep a clean composition.

07.

Photography

Photography

Here at Bitcoin Depot, we're confident, bold, and fast. Having these great qualities, it is imperative to communicate to consumers the same way we communicate visually, with consistency. It is important to keep the same tone of photographic imagery when editing photos. Photographic images are set as cool-toned, well balanced and a slight grain to give the image a slight texture.

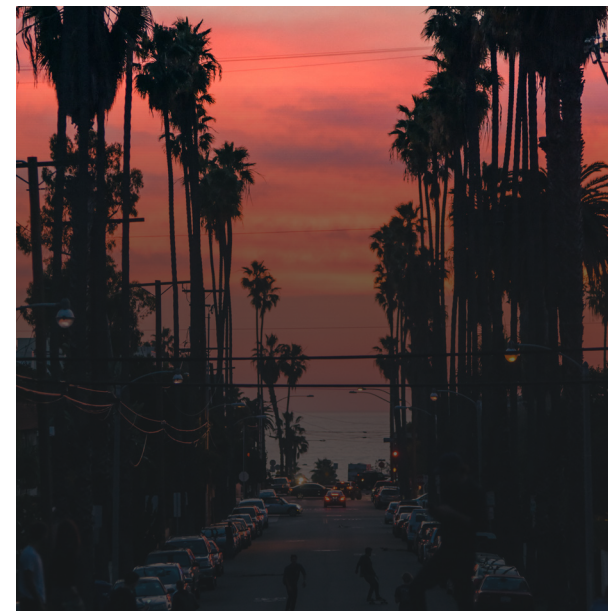

Photography

Requirements:

- Interesting angles
- High Contrast
- Minimalistic look
- Cool-toned

Stock Photography

In instances when needing to choose photography, select well balanced images with interesting angles and edit the photos to match our brand standards. When searching for an location based image, Bitcoin Depot uses soft-lit photographs of cities and a soft grain texture overlayed on them.

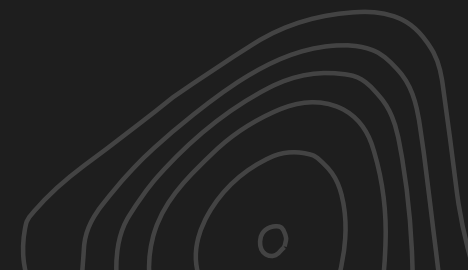

08.

Assets & Elements

Stylistic Details

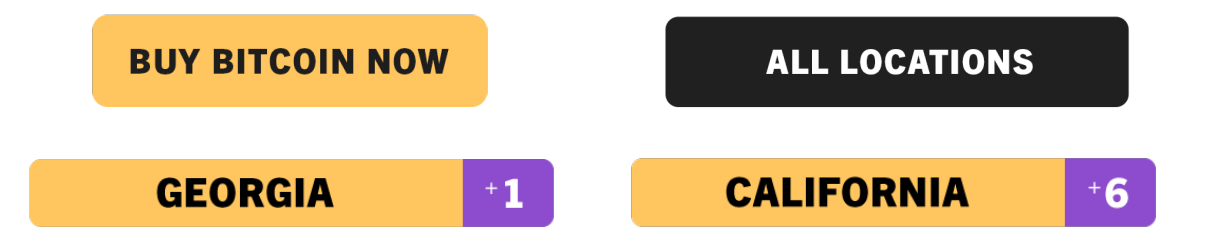

Here at Bitcoin Depot, we're confident, bold, and fast. Having these great qualities, it's imperative to communicate to consumers the same way we communicate visually, with consistency.

Assets

Buttons

Buttons are typically used when creating promotional banners, newsletters, and utilized on our website. Bitcoin Depot has an established set of styled buttons to use when they are necessary and needed for those instances. All buttons are colored from either the gold yellow, dark grey, or white, and rarely purple. Depending on the application, these buttons are used selectively.

Button Application & Standards

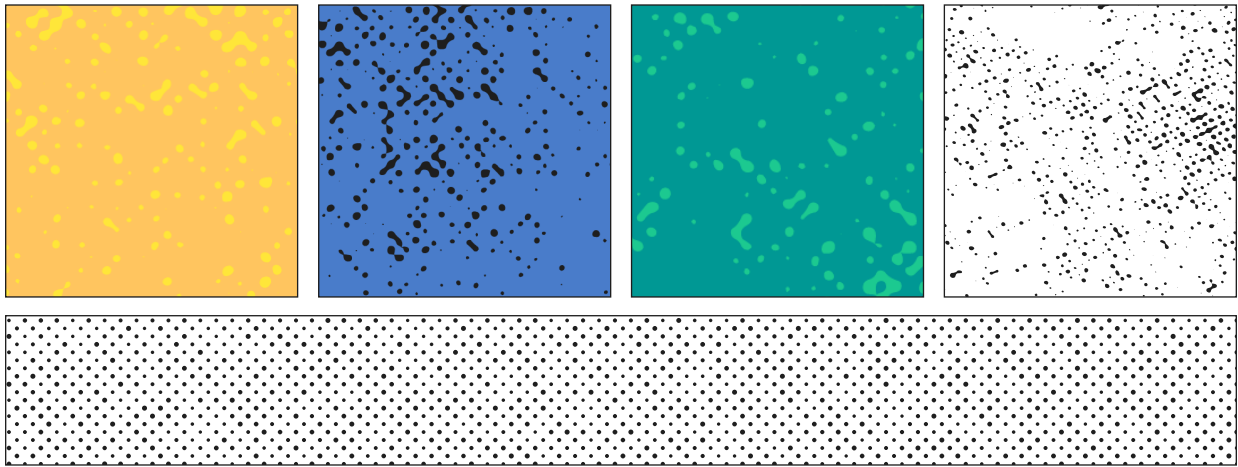

- Never have buttons floating around. Align buttons to artboard and or text lines
- Buttons should never have more than 2-3 words on them, *rarely* 4 words
- Buttons have rounded corners with a 20px radius
- Center text in button and size accordingly
- Do not forget to kern and track

Textures

Textures are usually applied to social media graphics and website assets. It is important to use these textures wisely and be always aware of placement to keep a well balanced composition.

Halftone & Stipple

Our topographic pattern is a more symbolic pattern, representing the different vallies and ranges our BTMs can be located at in the US. These patterns are generally used as a design flourishment.

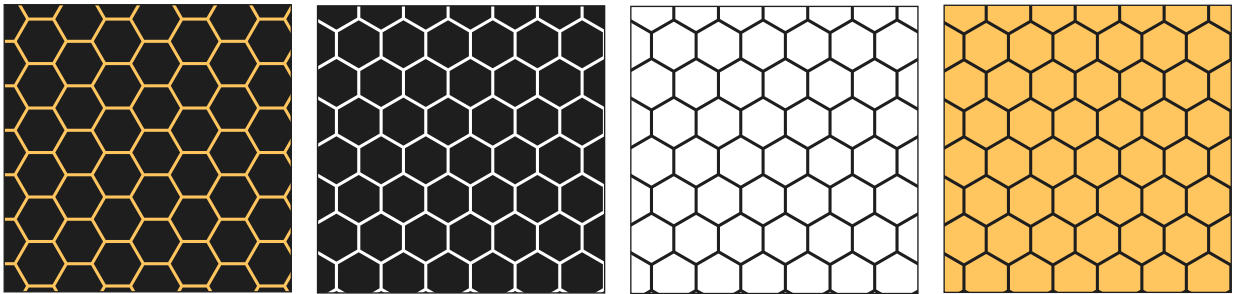

Patterns

The use for applying patterns is a gentle finishing touch on flyers, banners, and newsletters to add flair and eliminate any remaining awkward negative space. Using patterns is fairly common, and needs to be added thoughtfully. There are different color applications to use patterns on and different ways to apply these patterns correctly.

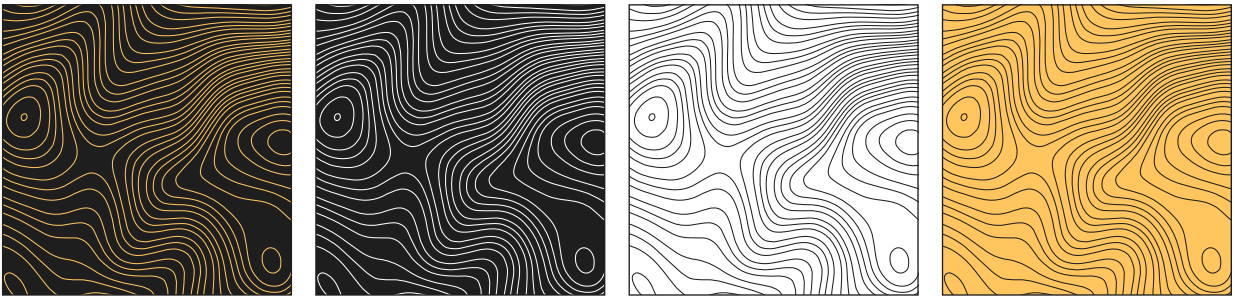

Honeycomb

The honeycomb pattern is our traditional pattern, and is representative off the Bitcoin Depot logo. These patterns are generally used when creating flyers, banners, newsletters, and more.

Topographic

Our topographic pattern is a more symbolic pattern, representing the different vallies and ranges our BTMs can be located at in the US. These patterns are generally used as a design flourishment.

Texture/Pattern Application & Standards

- Be mindful of pattern shapes in relation to copy and other graphic elements on the design
- Okay to use transparency gradients on only patterns
- Never distort pattern or texture to fit the design
- Do not use colors that are not the approved Bitcoin Depot palette
- Always make the copy more legible than the pattern or texture
- Never apply hexagonal shapes over honeycomb-like patterns
- Never use both patterns and textures together in the same design, or they will clash
