

NY ATM Boosts Revenue Through Bitcoin Depot® Partnership

THE APPROACH

Since the partnership between NY ATM and Bitcoin Depot® began in April of 2020, Weilbaker expanded his offerings to his network retailers to include Bitcoin ATMs. He explained that this partnership not only represented a new era in the ATM industry, but also forged new business opportunities and relationships, thereby setting the stage for mutual business success.

He went on to mention that retailers were jumping at the chance to work with Bitcoin Depot as their Bitcoin ATMs bring in greater foot traffic, provide guaranteed rent for the space, and increase the retailer's cash ATM volume.

As for Smith, his experience in the cash ATM industry for 20 years has allowed him to connect with professionals in the sector with a sense of familiarity and common vision. Smith's mission has been to deliver the service Weilbaker and other partners have been expecting over the years, and that's exactly what he set out to do with Weilbaker at NY ATM.

THE RESULT

Since working with Bitcoin Depot®, The NY ATM co-founder has enjoyed multiple benefits as a result of the partnership. For one, he saw an increase in his cash ATM revenue by as much as 35% when he installed a Bitcoin Depot ATM next to his cash ATMs, which Weilbaker says "is a significant increase in a year that was otherwise quite challenging for us." Additionally, Weilbaker was able to strengthen his existing relationships with retailers while building new business relationships. "I've found that working with Mark has been great in the sense that everything he's said about the partnership outcome came true," he said. "Bitcoin Depot® has a real vision and they stuck to it."

"Mark has been much more cognizant of the importance of the customer relationship," he said. "Bitcoin Depot has a very stable business model because of their steadfast commitment to providing a turnkey experience. Mark's team has been doing all the work in terms of installing and maintaining the Bitcoin ATMs, and the communication has been consistent throughout the partnership." This has resulted in NY ATM expanding his ATM footprint while creating a symbiotic relationship geared towards mutual business growth. He adds that "with Bitcoin Depot's fantastic turnkey offer to retailers, I was able to sign up over 300 retailers in 6 months to host Bitcoin Depot ATMs. In return, this company provided me a guaranteed monthly residual income per location for the life of the contract regardless of performance. I'm very pleased with the money I'm making."
